Established General Practice Clinic at the Costa del Sol

An excellent opportunity for a doctor G.P. taking over a practice at the Costa del Sol established since more as 9 years with a customer database of approx. 1,000 patients.

The practice is ideally located in a well known Commercial Centre at the new golden mile between Marbella and Estepona – a region of great popularity at residents of all nationalities.

The patients correspondingly partitioned: 50% are English and the remaining 50% are German.

The car park possibilities for patients are excellent what means an incalculable advantage both for the patients and for the practice.

The premises of the practice itself are decorated brightly and friendly and have a total area of 100 m² which is divided up into three practice rooms, a waiting room and a toilet.

The doctor practising at present is German, his studies have gone through both in U.K. and in the United States and only personal reasons make the take-over possibly for his well established practice. The successor of course gets every support for a transition period still to be agreed on to ensure a smooth take-over.

This unique offer represents an excellent opportunity to take a doctor's practice introduced for years in one of the most beautiful and most favourite regions of Europe with a large patient stock.

Dermatologists also should feel mentioned since this medical area strongly is underserved and therefore excellent prospects exist. Other fields of study are of course also welcome.

A continuation as a group practice is also conceivable, we ask for corresponding inquiries to this. In this case of course a take-over of the patient stock is not considered.

Please notice that all following possibilities are available both one by one and into combination.

Price for patient stock: 330,000 euros

Rent of the practice: 3,500 euros p.m.

Price of the property (practice): 240,000 euros

Rent of a practice room at continuation of a group practice on inquiry.
