## Offer Corporate participation, firm participation **CFD-Tradingcoach for beginners**

fantastic references are present already. i am the author of the book " your way to the wealth " (isbnr. requested), which will appear world-wide with large success. on the basis a world-wide singular guidance I train " stock exchange laymen " within fewer hours to the successful cfd trader and lead thus humans to the wealth. this guidance developed from each layman in few hours easily convertible, in this form world-wide singularly and the enterprise concept and very profit yielding. my safe kind of the indicator search is trained in my book. the demand is already now very high. numerous international markets are appropriate for my guidance " virgin " to feet and by a publisher and new yorker lawyer were already eroiert. price of the book/guidance: 99, - euro!

expecting sells per annum: at least 10,000 pieces/world-wide. various tv- and press releases (at approx. 46,000 journalists) are already prepared. it was planned that the publisher wanted to take part in the project, however in 8 months nothing brought and I quit the author contract now extraordinarily. Ssraight this publisher speaks however of conversions/profits in million height per annum. far high incomes/profits are expected by the abos of the lining up commercial letter. to the explanation: cfd trading is still relatively unknown (there only for 2 years for private people tradable), offers however the singular chance " from very small money (starting from approx. 300 €), reliably and constantly to make large money ". the investor certainly its financial risk. momentarily approx. 99% are all buyer a stock exchange layman, who did not have to do ever with the stock exchange. this reflects at the same time phänomenale sales prospects again, which can be opened with an accordingly aligned campaign. the present sales takes place only as " field test " and runs very promisingly. a potential partner/financier must not have stock exchange or expertise. these are within fewer hours of acquisition and convertible. with an active partner pc and internet knowledge, evtl also commercial basic knowledge of advantage, would be however not condition. the complete selling of the guidance effected fully automates over an internet platform. work therefore hardly results. the indicator search for the commercial letter is completed in the future via software. also here the dispatch is to take place to the subscribers automatically. an unusual chance and a profit yielding participation in a very fast growing enterprise are offered to you here.
