Look for Corporate financing, investor **Event Agency**

I would like to establish a new event agency in order to translate the many ideas and experiences of my previous stations into new paths in the field of the event industry. We are planning an association of several specialists to become one of the best trained event agencies, which can really make everything out of one nut in Germany and Europe. These include: catering, event logistics, event technology, event equipment, event design, artists, event consulting, event planning, event acquisition.

For a good start-up, we need financial support, because there is no time from existing companies and jobs without capital to place the new agency optimally on the market.

Capital

Region 34, Germany

Entry in own name
