

The big business marketplace

Business for sale more than 15 years

ID 10178

Look for Corporate participation, firm participation

Maschineconstruction

We have been building special web printing and punching machines for paper, cardboard and plastic material for more than 20 years.

Besides, we have been a partner of one of the production company, which has produced special products for a certain market. So, we can consider, that this market is well known for us. We have put together a very flexible and high productive machine-press and in combination with a totally new type of production method, we think we are in an ideal situation.

We are looking for a serious partner-investor for a mutual cooperation to enter this huge and profitable market.

It would be perfectly if our new partner has sales and marketing experience.
