Look for Corporate participation, firm participation

Real estate development / trade

I am looking for (more interested) investors who want to participate in a limited liability company/entrepreneurial company that invests in residential real estate. The investment would focus on objects from foreclosures and renovation/modernization objects, which would then have to be developed.

In the next few years, due to the economic situation, there will be interesting opportunities to invest in this asset class.

If you are interested in an asset in tangible assets, please register. I do not want to make any profit forecasts, which are usually not adhered to and are more likely to be used as bait, as my offer is based on mutual trust.

Personally, I have completed my business studies and more than 10 years of experience in banking and real estate. If you are interested, I can also send you documents with further explanations.
