Look for Corporate financing, investor

Satellite TV-Broadcaster

We are a satellite TV station, which broadcasts successful to a specific target group via satellite and internet. The technical range is 38.4 million households in Europe.

The daily program is produced in rented studios in a well-known media center. The tv-station is funded by classic TV advertising and by special - on the industry targeted - forms of advertising.

To be able to serve 3 important new clients and to build up a own studio for fast and flexible productions, we are looking for an investor, able and willing to invest 3 mio Euros and taking over as C.E.O.
