Look for Corporate financing, investor **Import**

We are a trading agency that specializes in the import and distribution of goods from China.

We, a team of Germans and Chinese, have many years of experience in China as well as with Chinese manufacturers and suppliers. We have our own representative office on site in China, our own, very well-trained employees, who ensure that we always get exactly what we ordered by shipping container: only top-quality products of excellent quality, all of them from growth sectors, including all technical test certificates & approvals for the German market (often also for the entire EU).

We have specialized in not representing cheap goods "Made-in-China", but we are looking & finding in China only top products that meet the highest German quality standards, all products that make the stuff to the world market leader. or trend leaders.
