CopyShop with trading with graphical devices

For sale is a CopyShop with trading in graphic devices.

Due to the death of the managing partner

I sell this company on behalf of my mother and myself. It was my father's company, who died recently.

It is a debt- and load-free GmbH with a large customer base and a long-term employee. The shop has been in existence for 26 years and is very conveniently located between the A30 and the A2 with a large car park.

The employee manages the day-to-day business independently and has a great deal of know-how in terms of customers, graphics and technology.

In the additional business, graphic devices and accessories are traded, and my father continued to offer the design and planning of advertising equipment as an agency service.

For more detailed information I am always available by or phone.

Our pricing is fair and realistic.
