Electrical engineering and safety technology

The well-known company, which has been established for years, specialises in planning, assembly and service for modern and innovative electrical and communication technology in buildings and medium-sized projects.

As a VdS installer for burglary and fire alarm technology, it specialises in security technology, which also includes access control, video and nurse call systems.

The customer base primarily includes well-known companies from trade and industry as well as banks and insurance companies.

The business premises are located in a private modern company building.

Takeover by agreement.

After signing a declaration of confidentiality and proof of capital, we provide serious interested parties with a detailed company presentation.
