

The big business marketplace

Business for sale more than 15 years

ID 13218

Offer Corporate sales, firm sales, sales

Online-placement of service providers

Our company is an international online market place where individuals and companies can post projects e.g. in IT, Web Design, Multimedia, Translation, Sales Support and Research.

How it works: Buyers describe the task and define the project terms. Within a few hours they receive bids from freelancers and companies from all over the world. The provider with the best bid is chosen online and the complete project - from contract management to secure payment - is managed online.

Our offer is specially attractive to founders of new businesses or investors who feel confident enough to turn this portal into a profitable company. Currently there are no significant sales as the portal is not actively promoted. As this is an internet company, physical location is irrelevant.

We offer our company as a whole or in parts. Operating costs are currently very low and can be neglected. There is no need to take over any employees, nor are there any other obligations.

The main parts of our company consist of the fully functional, ready-to-go and proven web appearance (PHP, multi-language, multi currency), a large number of registered service providers (from more than 100 countries) and service buyers, a large number of service provider addresses for further marketing and campaign purposes and an established brand name. The portal can easily be extended or changed (comprehensive strategy papers may possibly be part of the sale). In a short time frame e.g. it would be possible to build a complete resource management software solution or a white label solution for third companies.

Even without many employees but with a lot of enthusiasm and fresh thinking this company can quickly become a large success. We offer this chance at a very low price.
