Entrepreneurial business economist (VWA) and mechanical engineer for succession, interim or project management

You have a need for a short-term interim solution/project task or are looking for a successor for your company in the medium term. I am looking for a way into self-employment.

In the region around WN, S, GP, HN, LB and SHA, I have been able to build up, manage and successfully develop independent parts of the company several times. In addition to my business and technical training, a good basis for this was a high degree of responsibility, independence and commitment. Suppliers, customers and employees attest to a friendly and goal-oriented approach. Innovative and pragmatic solutions were always the basis for healthy sales growth and a very high level of customer satisfaction.

[Succession](#)

Region 74, Germany
