Good motorcycle workshop with parts trade for sale

Since we are about to move to Bavaria and work there, we would like to pass on our motorcycle workshop, also to a company founder.

We are looking for a fair and good screwdriver for our loyal customer base. We are a free workshop and in a wider area also the only one.

We have focused on the repair of scooters, quad bikes and motorcycles of all classes and brands and therefore have no fear of existence like the competition that has focused their business mainly on the sale of vehicles.

It is no exaggeration to say that we are playing in a different league than our team-mates and therefore have a high and ever-increasing workload.

The workshop can be taken over completely, so that everything is available to start immediately (incl. inventory, etc.) also the rental contracts for the premises can be transferred.
