

The big business marketplace

Business for sale more than 15 years

ID 13938

Offer Corporate follow-up, firm follow-up, follow-up **Solar Thermal Systems**

As part of a Succession plan, our Company is to be transferred to a Technician with practical and commercial Experience as well as to technically oriented Merchants. But the Company would also be ideally suited for the Expansion of a similarly oriented company (Heating, Climate Building technology ...).

The innovative Small Business in the South-west of the Republic has been developing and producing thermal Solar Systems since 1989, which are very different from the Market and have thus become the regional Market Leader without Advertising. In 1996, the Company was the first in the Industry to BE ISO 9001 certified. The Return is considerably higher than the Industry in a stable financial Situation.

The steady Growth in the Renewable Energy sector, regional Awareness and the Lead in Development with higher Efficiency ensure the Acquirer a good Future with appropriate Commitment.
