## Offer Corporate sales, firm sales, sales **Online trading**

Online trading in automotive literature. The well-known company was founded in 1980 and has been managed online since 2000. Brochures and press kits are available for all popular cars since 1975. The shop is aimed at car owners who are looking for records of their vehicle, companies who need the technical details of the competition, authors and journalists, researching on automotive topics, collectors. This offer is unique and has no competition!

Current inventory is more than 50,000 positions. For sale were the complete products, the online shop with a clear domain and an extensive customer list.

Family reasons are making the dedicated continuation of the shop impossible.

Price: EUR 180.000

The current inventory adds up to a seven-figure sale price!

Sales of online stores depends heavily on the use of the operator. The purchase price will be taken purely in two to three years without the inventory has depleted serious! After all, most deals are redundant.

Fixed costs for the operator are minimal. Storage costs of the goods (such as space 40 square meters), hosting the online store (currently EUR 80 per year), that is all. Costs for postage and packing will be passed to customers.

The company can be run independently of the location as a pure order. No additional staff is required. Simple English is useful, as customers call from all over the world. I like to put all used text blocks for the correspondence available and work yourself into the matter.

Your interest and your inquiries are welcome.

A warm greeting.
