Newly developed party system for sauna clubs

The newly developed party system for sauna clubs has been implemented very successfully with business partners.

The new admissions system with the party in Switzerland is still way beyond the "early stages" and will come in two years WIL breakthrough.

The developed party system itself is managed and operated by the company with the other services.

For the further development of the system and the overall Swiss market entry, the company needs more capital to the extent of CHF 300'000 .-.

Looking for the original company more financial partners.

One is ready for serious prospective Buisnessplan.

We look forward to hearing.
