

The big business marketplace

Business for sale more than 15 years

ID 15500

Look for Corporate financing, investor **Information Technology**

Ladies and Gentlemen,

for a start-up idea, that is, a new business idea, which is nearing completion, I am looking for private investors or silent partners (shareholders).

I am presently creating a B2B Internet platform for companies and customers worldwide, the site will be running in six languages. Both, companies and customers, will have an advantage of it. At the same time aid projects /NPO's will be supported from the gains.

The site is nearing completion and some companies have confirmed collaboration. In order to extend this platform, some programming is required. To complete the project as well as for its global market launch, I am looking for capital.

Depending on the offer, I offer percental shareholding. If you are interested, please contact me. Thank you.
