Electrical cabinets, test

For reasons of age is looking for a successor company or partnership to a limited liability company.

The design and manufacture of test equipment, assembly systems and cabinets (mechanical, electrical, electronics, hardware and software) are important areas.

The company has over 40 years experience in the following areas: development, production and sales of electrical and electronic equipment and appliances, hardware and software, mechanical, electrical and electronic assembly and test.

A further specification of the Gmbh is the manufacturing of electrical cabinets.

The planning, development, production and sales are therefore at the main activities.

Implemented is the electronic planning and development with various Cad applications such as Eplan, Wscad, Eagle and Labview.

For the mechanics, pneumatics and hydraulics etc. Autocad uses.

As a supplier to the automotive industry, in the field testing and assembly equipment (big customer base, very expandable, Europe and internationally, qualified personnel and modern equipment) would be an immediate or delayed acquisition desirable.

A successor company or partnership is required.
