## **Insect Farming**

Insect farm requires start-up capital!

I will set up an insect farm in Germany. There is a huge request by reptile and amphibians owners who need fodder for their animals. In future insects could also be an alternative food for humans.

I already found a Swiss investor who would finance 97% of the needed capital. Now I am looking for a partner who will carry the remaining 3%.

### Capital

Region 45, Germany

Entry in own name
