Business for sale more than 15 years

ID 16304

Offer Corporate sales, firm sales, sales **Online shop with cloud solution**

For sale is a long-established online trade with a focus on software, games and eBooks, founded in 1998.

Included are several specialized online stores; Interfaces and collaborations with sales platforms (eBay, Rakuten, Yatego, ...) and a customer base of 30,000 + active customers as well as about 80,000 interested parties.

The items are mainly electronic licenses, but also box products for which no own shipping is required (track store). In total, this is currently about 300,000 individual products. Warehousing is not required.

There are contracts with several well-known suppliers, which also allow an expansion of the product range.

The orders are handled via their own multi-channel cloud-based solution, which can both take over the data of the suppliers and place them in the connected shops, as well as process the orders.
