## Look for Corporate financing, investor **E Mobile Activity Center**

The Future in the Field of Mobility is Electric Mobility. This is exactly where we see a huge Opportunity for a constantly growing Market over the next few Decades. Currently it is the E Bikes, in a short way the E scooters and Motorcycles. As well as the E Cars and other E Vehicles.

We are a small and growing Team that has a lot of Experience in the Vehicle sector, including the e-bike Sector.

Now it's Time to start the End Customer with an E Mobilitäts Shop. We start by and also need Capital, which we pass on in the Form of a Participation.

The Launch will take place with E-bikes, E Scooters and small Electric Cars. In a former Car Dealership is started and of course with an Online Shop.

To get it all started, a Capital of 500,000 Euros is needed.

If You are Interested in getting into this Market, then we are looking forward to a Message.

### Capital

Region 88, Germany
