Outpatient Nursing

Outpatient health care for sale.

We are a small to medium-sized company that currently serves 33 patients of the most diverse care levels sgb IX and according to regulations § 37.2 sgb V. We have contracts with the sick,-and care coffers of the Landcircle.

There are leasing vehicles that do not necessarily have to be taken over but can also be taken over if they wish. The employees are made up of tested and untrained care workers. A plebeian service is also employed. The staff must be taken over. Since the seat of the company is in the property, the premises can be rented which could possibly be counted towards the Purchase Price.

I would personally talk about individual negotiating points.

Please only serious offers.
