Helicopter company for sightseeing flights and underload transportation

I want to start a helicopter company. The company should offer primarily at events or in other frame, scenic flights for everyone. More I want to offer also VIP shuttle for customers who want to from A to B. Subsequently, I also want to underload transports such as Offering hut supplies fire fighting from the air, timber logging, installation work or underload transportation for construction sites. More I would like to also offer photo and film flights. These flights should specifically for movie recording such as at major events and happenings. In another episode I will also offer heliskiing.

Capital is used to purchase a used helicopter hangar, slings for underload transportation, vehicle tank system for mobile and transportation for slings and much more.
