## **Internet Trading Eroticism**

We are a young Online Company that now exists for about 1 Year, are now also represented on Amazon, among other things.

We would now like to source our Product range directly from the Manufacturers and no longer from the Wholesalers, 1. to make their Profits run into our Company.

2. If we would then have a lot more Product Selection from the Manufacturers, most of these Products are not found at any of the Wholesalers that our Customers would be happy about.

3. In the Case of some of the Items (Clothing), we could also order clothing sizes where there is also demand, as very few have specialised or offer these Sizes.

But the Problem now is that we have Minimum purchase levels for Manufacturers and that we are therefore looking for one or more silent Partners. Since the Purchase Costs are very low for the Individual Pieces would take us about 2,500 euros long.
