Look for Corporate follow-up, firm follow-up, follow-up

## **Acrylic glass production/processing**

Our client is active as a manufacturer of acrylic glass, PET and polycarbonate and successfully manufactures on the market with its own products.

We are looking for a manufacturer of acrylic glass or a company for acrylic glass processing. The acquisition of a manufacturer or processor of other materials such as PET, polycarbonate, etc., is also conceivable.

On the one hand, this is intended to expand the product range and, on the other hand, to increase its capacities.

We are mainly looking for in central Hesse. Alternatively in the neighbouring federal states or alternatively in Poland or the Czech Republic.

We are mandated by our certified client and are happy to send a buyer profile if you are interested.
