Design label

We are a newly founded design label with the aim of producing and distributing very high-quality (small-scale/manufacture) products. Since this is primarily about class rather than mass, we want to establish a European brand that only has it produced under fair conditions within the EU. We do not just want to offer beautiful things, but also to serve as role models and to strengthen European connections. In addition to offering a very attractive product portfolio in the very near future, our other project is to establish an internet club with lifestyle portal, forum and chat, in which our customers can exchange ideas about our products and other lifestyle topics. In order to be able to realize our idea as quickly as possible, we need capital and know-how. We are looking for sponsors or business partners to get our idea going. In return such as
