Look for Corporate financing, investor

General import

Ladies and gentlemen,

We specialise in the import of high-quality and exclusive products from the USA, Scandinavia, UK, Ireland, Asia and Eastern Europe to Germany and serve the ever-growing pet industry, which with a total of 3,909 million euros Of total sales in the trade and retail sector, it was 1.1 per cent higher than the previous year.

We only import goods and goods that are not yet available on the German market. We buy directly from the manufacturer.

In order to finance our purchases of goods, we are therefore looking for investors, investors and silent shareholders.

If one considers our capital requirements, it is rather small compared to the sums invested in "competitors" by investors in the last 2 years in the millions. Some of these firms with millions of venture capital have long since disappeared from the market.
