Since we have the best prospects for the future and very steep figures, we are looking for an investor to hedge and expand our sales.

Targets such as securing ownership, expanding one of the two sales sectors through construction, increasing sales by 80-100% over the next 5 years and increasing the catchment area to the whole of Europe can be achieved.

The regional realities of the industry would allow this to happen. Since our concept has started in 7 years from zero to the top 10 of the competition in Germany, we would like to talk to an investor about the circumstances.

Returns of up to 12% can be achieved for 15 years. would be the optimal time.
