Consulting

You're a founding nature? Do you already have experience as a founder? Then you have a good opportunity with us to link the two together. We are a start-up consultancy based in Constance. We are in the process of exploring new shores.

We are still looking for suitable regional partners for the expansion in the German-speaking region. The idea behind our company is simple: Every year in Germany, about 500,000 people dare to step into self-employment and entrepreneurship. With an innovative concept that completely redefines online and offline offerings for founders, we will accompany these founders fairly and on a needs-based basis. Through favorable conditions for start-up support and start-up services, we enable founders to get off to a successful and affordable start and to concentrate fully on their products.

We are open to versatile talent.
