Medical Product

I offer here the Adoption of a marketable Business idea in the Field of Medical Hardware Product, patented very cheaply in to a suitable Successor for reasons of Age. The Successor can immediately produce and sell Equipment himself. Customers are: Accident clinics, Discarded surgical medical Practices, Orthopaedic surgeons and Veterinarians. Likewise, Children's Clinges. The Product has been very well received in the User base, and there are various written quality and functional evaluations. It is the world's fastest and safest cast cutter for Cutting up plaster bandages of all Kinds. Preliminary Knowledge not required however, the Successor still needs to offer the Product and introduce it to the Market. Careful Induction is a matter of Course.
