## **Production of medical- and biotechnology-instruments**

We are looking for a buyer for our company for age reasons.

Our products: Laboratory pumps (also called hose pumps or peristaltic pumps), laboratory biotactors (stirring, fixed bed and airlift fermentors up to 20 l, fluidized bed bioreactor (patent) and accessories for use in pharmaceutical, medical and biotechnology fields, and one 7 liter high-pressure media autoclave with integrated mixing and filling system for laboratory. Our latest product is a 12-compartment cell culture fermenter which is on the market since . The fermenter can be used in parallel cultivation of human, animal and adherent cells and is suitable for the use in medical and pharmaceutical teaching and research.

We are currently involved in an EU project, a cooperation between the university and companies in Finland and Germany. The project will be completed by the end of . In this project, a bioreactor was developed for tests and preliminary investigations in the pharmaceutical industry.
