We are a well-established 3D printing company and are looking for a successor on Lake Constance

The company was founded as a limited liability company 3 years ago and has already developed a good customer base. It operates in a rented store in a romantic lakeside recreation town and, as an authorized reseller, represents several 3D printer makers. It also sells 3D printing services, design services as well as maintenance and repair of 3D printers.

It is ideal for a constructor or at least someone who has experience with CAD.

The owner wants to retire for health reasons. Sales in the course of a proper company succession and thorough training in the technical and commercial fields are ensured and thus offers a good chance of self-employment.

The 3D printing market has a high growth potential, the turnover of 200-300.000EUR is easily expanded.
