Development of Apps for mobile Devices

The global Mobile app and Gaming market has exploded over its roughly ten Years of existence. With Apps and the Companies behind them, Billions are being implemented with astonishing Regularity. We would also like to have a Piece of this gigantic Cake. To do this, we have teamed up as entrepreneurs to act as a Parent company for app development studios and to handle Financing, Marketing and Sales for them.

Two Companies were Founded: The Foundation as an Umbrella Company and a Limited Liability company, as a 100 percent subsidiary, which realizes our first Apps and Games as a creative studio.
