Properties from auctions

We are a network of successful and yield-oriented entrepreneurs who see significantly higher chances of making good money in niche markets.

This is where we invest: Fact 1:

The cramped living space in large cities is becoming increasingly unattractive to families – so more expensive. Many therefore prefer to move to adjoining smaller towns that offer attractive and affordable housing for themselves and the family.

That's where we invest.

Fact 2:

The small towns are growing steadily due to successful local agricultural, industrial and commercial enterprises.

That's where we invest.

Fact 3:

Large companies, especially the big commercial and logistics companies, need fast transport connections and larger storage areas. They are increasingly settling in more rural areas due to low costs and modern infrastructure. This creates additional jobs there-and thus increasing demand for housing.

That's where we invest.
