

The big business marketplace

Business for sale more than 15 years

ID 20283

Offer Corporate sales, firm sales, sales **Online IT shop**

The shop has been on the market since and has several thousand registered buyers. We mainly offer complete systems, notebooks, Apple, mini computers, tablets, component/hardware, software and much more. Many companies, public institutions and schools regularly source hardware from us. I myself did not take over the shop until October , and it is going very well. From the first day of the takeover, sales are guaranteed. There are no liabilities. The shop is sold because shortly after the takeover there was more professional access, and I actually hardly have time to really take care of the shop. It has nevertheless grown to my heart in time, but I no longer manage to do everything. 100% of all customers are online customers who get the ordered delivered. The location is therefore insignificant and can be done from anywhere.
