Communication electronics for voice allocations

In the course of age-related succession, we are looking for a taker with an interest in a complete takeover in a timely manner.

The company is a system specialist for communications electronics in the fields of voice alarms and video surveillance, which is active throughout Germany and is a central headquarters in Germany.

For 30 years, customers with a high and needs-based consulting expertise have been successfully supported in the realization of their individual wishes. This is done taking into account the legal standards and regulations in this important area within the security technology.

In accordance with the VDE guidelines, the company is certified by the TÜV Rhineland in accordance with the TÜV Rhineland (for voice allocations) and is only worked with certified and certified suppliers and products (EN-and ISO standards).
