Offer Franchise, license

Waste-water clearing technology

Offer technology transfer in the area of wastewater purification (know-how / IP rights) for use through licenses or the sale of a patent. The physical technology substituted classical, biological process methods us is universally applicable in many areas of the industrial, municipal sewage purification.

Applications are for example:

- Micro pollutants (municipal wastewater) and substitutional O3 / PAC
- Micro-plastic
- ion-selective depletion in wastewater (Cl⁻; SO₄²⁻; NO₂ / NO₃; NH-N u.a.
- Coffee extraction press water / waste water
- Automotive Industry - Pressure Washer Wastewater / Removal of Glycols
- Dairy wastewater
- Cosmetic industrial wastewater
- refinery wastewater
- H₂ technology for the generation of electrical energy / fuel cell

A proof of concept is available for all applications and the functionality is guaranteed even with the installation and commissioning.
