## **Metal processing/component production**

The company from the Rhine-Neckar-district owns an extensive machinery with high-quality components for machine and tool construction.

In addition, the company implements complete designs of assemblies, individual parts and small series.

Another area is tool manufacturing in the context of punching and forming technology.

The average turnover for the last three years is EUR 380tEUR, with a significant increase last year.

There are also different perspectives for the expansion of the plant.

The seller is available to the buyer as a consultant and employee for an induction phase if requested.
