## **Agricultural machinery master workshop**

Our client is a small third-generation agricultural machinery master workshop in the heart of Allgäu. For health reasons, a partner is sought as soon as possible, with the prospect of a later takeover of the company.

Due to the "old obsession" with the company, it has a fixed, long-standing and reliable customer base. In recent years, the company has not only seen increasing support from customers outside the community, but also gained customers from the construction machinery sector due to many years of experience in agricultural machinery repair and retail. Be.

Since it is a free workshop, the company is not bound to any contractors, there are no framework agreements with suppliers. The workshop was rebuilt about 10 years ago, and since then the focus has also been on small appliances for forest and garden.
