Look for Corporate financing, investor
Software

Young company in the Temporary Staff Industry wants to hive its developed software into a seperate, ambiguous Start-Up in Cologne and is seeking seed-funding to finance the appropriate lean organization with agile management and robust processes to effectively market its software as a service (SAS) as of . The software is cloud-based and for three dimensional (3D) personnel planning (PEP) in the temporary staff industry. The software development is by 98% complete. At a later stage the extension of the product portfolio around the core of enterprise resource planning is envisioned.
Potential investors with knowledge in the temporary staff industry are preferred.
