Safety Technology/Perimeter Protection

We are looking For partners from the field of safety technology/electrical Engineering for the Nationwide development of a sales/Equipment network. It is about building a Network that offers Security Technology/Surveillance technology from a Single Cast. Each Partner brings in according to their know-how and benefits from the common Business Concept. For Example, With a wireless Solution for quick and easy Fence securing, Fence Monitoring and Outdoor area protection, many potential Customers can be approached who have large Operating Spaces and shy away from costly Installations. Combined with Video Surveillance and Connectivity to an emergency service control center, this can be the perfect Solution to Customer Requests.
