Offer Corporate sales, firm sales, sales **Online shop for car tuning parts**

A web shop for car parts is offered. The webshop has been online in and has generated more than 68,000 euros in sales (net) from the stand during this time. The average value per order is in the triple digits. Because we saw the great potential that is in the shop, we took over the shop and wanted to continue operating it under a new brand (as a business area expansion). Unfortunately, we currently lack the time. That is why we have decided not to continue at this point.

What's included:

- Brand with own corporate design (logo, customized responsive web design, customized document templates)
- Domain name, SSL certificate
- Product catalogue with more than 40,000 items (exhaust systems, chassis and engine technology). The items are provided with features and attributes to allow the customer to easily assign them to their car. The article descriptions are individually designed.
