Look for Corporate participation, firm participation

Production and trade

We very successfully produce special LowCarb foods as well as dietary supplement products for use in the hCG diet/metabolic cure. With 17 employees and annual annual sales of EUR 2.5 million, we are the number one in our division. Our products are also purchased directly from Amazon in bulk and distributed to end customers on their behalf on the Amazon marketplace. Our own online shop still accounts for more than 50% of current total sales. Furthermore, our customers will find us through the largest Facebook group on the hCG diet with over 17000 active members.
To date, we have not done any marketing, as our recommendation rate is around 80% according to our own survey. We are looking for a partner to finance further growth and protection against competitors through professional marketing. Our company is exemplary and debt-free.
