Offer Corporate participation, firm participation

## **Manufacturer components (wood & plastic)**

It is a small group of companies in the construction and construction sector. The core business is the manufacture and industrial production of components. The product portfolio consists of both plastic and wood products. The Group's companies have a great depth of production.

Market positioning in the traditional markets (D/A/CH region) has grown over decades, and demand in global hotspots for German quality products in the construction industry is rising sharply.

An investor is therefore being sought for a stake or majority stake in order to support and realign the company for the future challenges.
