## **Plastic coating**

The owner-managed company from southern Baden-Württemberg coats components for the mechanical and mould making, automotive, furniture and construction industries as well as medical technology depending on customer specifications. A state-of-the-art powder coating system enables the refinement of batches of different sizes in different qualities.

It is possible to coat plastic micles of cast metals, steel, galvanized steel and aluminum as well as other materials of various sizes with various color types.

Since January this year, the company has also been offering machining services (CNC/CNC milling), expanding the value chain.
