Business for sale more than 15 years

ID 21159

## Look for Corporate follow-up, firm follow-up, follow-up **Metalworking**

As an ' entrepreneur ', I am looking for a metal processing company from the sheet metal and machining industry or plant construction with around 50-100 employees or around EUR 5 to 10 million in sales. The entry can take place through active participation up to a 100% follow-up.

With my many years of industrial and medium-sized business experience from plant and project engineer (materials custom equipment metallurgy) to production and site managers at home and abroad to technical managing director in metal processing, machinery and machinery and In the long term, I would like to secure and further develop plant construction in the future success of an existing company.

The continuation, creation and expansion of a family-owned family business secured in perspective is therefore my driving force. Equity, extensive sales experience (B2B) and good network for synergies are available.

I am happy about Germany-wide offers and inscriptions.

### Succession

Region 33, Germany

Entry in own name
