Credit card making of precious metals

We sell a co-branding which allows you to sell credit cards not only in plastic but also in pure precious metal.

The branding is approved for the entire SEPA area and can be implemented at very short notice.

You still decide on your new design and the fees and prices. The co-brand partner is also the producer of the cards, which considerably simplifies the entire ordering and handling process. You have no production costs.

The product is ideal for sale to elite residential customers or for other brands to manufacturers and distributors of luxury goods industry. On an existing homepage can be set up immediately, and the ticket system is already connected and thus fully functional. As an issuer, we can offer an English or German bank. Previous knowledge is not required for this company.

Co-branding for precious metal credit cards is not available on the European market to our knowledge.

An almost unique opportunity to start immediately with an existing and virtually unrivaled luxury product.
