Look for Corporate participation, firm participation

Production of trend drinks/shots

We are a small company dedicated to implementing trendy and cult ideas in the field of Shots/Spirits.

We have developed a 2 chambers and 3 chambers mug in which we fill several shots and market them.

We have existing patent/design protection on our cups and the names of the products are also registered and protected by the DPMA.

For larger projects, we are looking for an investor to support us with "fresh capital."
