Sales of IT services (game extension)

I would like to sell my small business (since April). It is the distribution of IT services. You get a full error-free product range when you buy and if you have no interest in further development, you only have to take care of the support of the company. Currently, there is a three- to four-digit monthly turnover. Since April , the company has generated sales of almost 15,000 euros. It is sold due to a ban on the main employer. The products distributed are plugins for a very popular online game.
