

The big business marketplace

Business for sale more than 15 years

ID 21618

Look for Corporate financing, investor **(vertebral column) Implants**

We are a small but very innovative manufacturer of implants from northern Germany. Two years ago, we successfully restructured the business and set our focus. We need additional capital for the construction and expansion. Especially for the final development steps as well as the market launch of a new and already patented product for spinal care.

We would like to welcome one to max. four silent partners into our company. The capital would be fixed interest and provided with an additional profit share. The aim is to finance approx. 400,- TEUR. Much more extensive collateral is provided by large CNC machinery and supplies.

Capital

Region 22, Germany

Entry in own name
