Trade in dietary supplements

together

I am managing director of a still young GmbH in the field of dietary supplements, especially e.g. protein powder or vegan alternatives.

We have been online with our products since the middle of the year and are already making our first sales (also to Austria).

Overall, the response to our products is extremely positive, which is why we are currently looking for capital to further expand the product range and invest more in marketing.

On request, I will be happy to share further information with you.
